DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In line 1 of the Abstract, Applicant includes the word "invention", which is improper language for the Abstract. Correction is required.

Application/Control Number: 10/509,995 Page 3

Art Unit: 3636

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "lighting fixture" in claim 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/509,995

Art Unit: 3636

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hooven (U.S. Patnent No. 394,271).

Hooven teaches the structure as claimed (See Figures 1-4 and the specification).

Claims 1- 3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Pulsifer (U.S. Patnent No. 2,638,152)).

Pulsifer teaches the structure as claimed (See Figures 1-9 and the specification).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hooven In view of O'Connor et al (U.S. Patent No. 6,123,389) and Clough (U.S. Patent No. 6,123,389).

Art Unit: 3636

Hooven teches the structure substantially as claimed but does not teach the side components. However, O'Connor et al and Clough teach side components. It would have been obvious and well within the level of ordinary skill in the art to modify the headrest, as taught by Hooven, to include side components, as taught by O'Connor and Clough, since the side components would provide even greater comfort to the user and accommodate a larger number of users of the headrest who desire various levels of comfort.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hooven in view of O'Connor et al and Clough as applied to claim 7 above, and further in view of .Gaetano et al (U.S. Patent No. 6,126,233).

Hooven in view of O'Connor et al and Clough teaches the structure substantially as claimed but does not teach Lighting fixture in the side components. However, Gaetano et al. Teaches lighting fixtures in side components. It would have been obvious and well within the level of ordinary skill in the art to modify the side components, as taught by Hooven in view of O'Connor et al and Clough, to include a lighting fixture, as taught by Gaetano et al, since it would provide lighting for reading among other things.

Application/Control Number: 10/509,995

Art Unit: 3636

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ito and O'Connor et al teach structure similar to the present invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney B. White whose telephone number is (571) 272-6863. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Cuomo can be reached on (571) 272-6856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
